

NONVIABLE VACCINE RETURNS

What NOT to Return to McKesson

The following items should *NEVER* be returned to McKesson:

- Syringes that you filled yourself but did not use.
- Any used syringes with or without needles attached.
- Broken vials.
- Any multidose vial from which some doses have already been withdrawn.

The items listed above should be disposed of according to usual medical biosafety procedures, and according to your immunization program's procedures.

What Should be Returned to McKesson

The following items should be returned to McKesson:

- Spoiled or expired product in its original vial or pre-filled syringe.
- Unused pre-filled syringes from manufacturers with an NDC printed on them.
- Unused Novartis Fluvirin pre-filled syringes with staked needles (NDC 66521-0111-01) are the ONLY items that can be returned with a needle. The needle should be capped and the syringes returned in their original packaging to the extent possible. (Absolutely no other needle can be returned to McKesson.)

Federal excise tax (FET) credits can only be processed for unopened vials and for unopened manufacturer pre-filled syringes. Returns of product other than these are not eligible for FET credit.

Reminder: These returns should be sent back to McKesson with a completed return form in the McKesson box with the preprinted return label.
